CALLAWAY
CATTLE COMPANY

8th Annual

AFFORDA **BULL** SALE

We would like to extend to you a special invitation to the 8th annual **Afforda-BULL-Sale**. This year's sale promises to be special with a number of changes. First, it will be held at a new location, Callaway Cattle Company in Hogansville, Georgia. This year for the first time, the bulls and females will not walk through a sale ring, but instead will be sold from a video of each individual. All sale animals will be on display in grass lots for up-close and easy viewing prior to the sale. They can also be seen on video prior to the sale by visiting our websites.

We are excited about the bulls we are bringing to the sale this year. We think they are the deepest group we have ever offered. They have been hand fed a ration designed to gain three pounds per day, not four or five. Thus, they are not overly fat. They were developed in large pastures with free choice hay. They are athletic and ready to cover a reasonable number of cows this breeding season.

All the bulls were ultrasounded by Dr. Dean Pringle, of Pringle Imaging in late September for marbling scores, ribeye area and back fat. You will see the actual scores on each bull, as well as his carcass trait EPDs.

Dr. Phillip Wilson of Southland Veterinary Clinic did breeding soundness exams on all the bulls in late October. Every bull in the sale passed, and all are fully guaranteed for the first breeding season. Our general rule of thumb is one cow for each month of age of the bull.

These bulls in the sale exceed the breed averages in many traits. All EPDs and their percentile rankings are printed in the catalog. You will see that many of these bulls rank in the top 5, 10, 20, or 30 percent of all the Angus and SimAngus bulls in the country. If we can help interpret any of these numbers, please don't hesitate to ask.

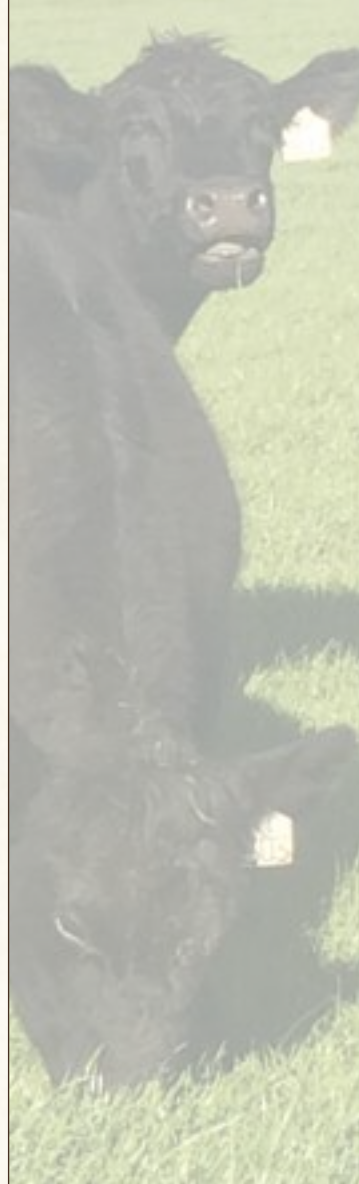

Again, this year our good friend and longtime bull customer, Clay Allen of Honeywood Farms at Barnesville Georgia is bringing 30 nice bred heifers and 10 open heifers ready to breed. The bred heifers were ultrasounded for pregnancy on September 11th by Greg Clements of Dogwood Genetics. See all the pertinent info for these girls listed in the back of the catalog. All heifers are bred to calving-ease bulls purchased from our sale.

We would like to express our thanks to our many valued customers over the years. It is very gratifying to get the good reports on how the bulls and females have worked for each of you. Thank you for your business, your confidence in our programs and your friendship.

Make plans to join us anytime on Friday, to view the cattle at your leisure. We will have the grill hot that evening, and we invite you to join us for supper at dusk. We'll have coffee and pastries first thing Saturday morning with lunch served at 11 a.m., followed by the sale at noon. We hope to see you then.

Mike and Christy McCravy

John and Marcia Callaway

8th Annual

AFFORDA **BULLS** SALE

Saturday, November 21, 2020 at 12:00 PM

Callaway Cattle Company

Hogansville, GA

INFORMATION

SCHEDULE OF EVENTS

Before Thursday November 19 – Cattle can be seen at farms

Thursday, November 19 – Cattle available for viewing after 12 noon

Friday, November 20 – Cattle available for viewing all day

Saturday, November 21 – 8 a.m. – Coffee & donuts

11 a.m. – Lunch

12 NOON – SALE

SALE STAFF

Auctioneer: Carroll Cannon 229-881-0721

Ringman: Glenn Smith 478-747-6539

Ringman: Paul Wall 678-898-0028

ABSENTEE BIDDING

If you are unable to attend the sale but wish to bid, please contact us in advance to register. We will have a conference call phone line set up on sale day. When you pre-register we will give you a dial-in number to call at noon on sale day as well as an access code to get connected. Then you can listen to the entire sale live and bid on any bulls or females. If you are unable to be on the phone during the auction, a bid may be left with any of the sale staff or the hosts: John, Mike, Wes or Clay. All bids left in advance will be handled with the utmost integrity.

HEALTH

Bulls have been vaccinated for IBR, BRSV, BVD, PI-3, Pasteurella, Leptospirosis, Vibrio and Clostridial diseases. All bulls have been wormed alternately with Dectomax and Valbazen and all are virgin bulls. Proper interstate health papers will be available at checkout.

FERTILITY

All bulls have been semen tested by Dr. Philip Wilson approximately 30 days prior to sale and will be accompanied with proper documentation.

TERMS AND CONDITIONS

All Bulls sell under the terms and conditions of each breed association. We guarantee all bulls sold in this sale to be fertile for the first breeding season if they have been given proper care. If a bull fails to settle cows during the first breeding season, we will provide a satisfactory replacement if one is available, or issue a credit, less salvage value toward next year's sale. If there is a problem we would ask to be notified as soon as possible. This is not a life insurance policy. We would suggest that proper care and nutrition be provided to these animals.

WINTER CARE

If you are not ready to take your bull(s) at sale time, we offer a Winter Care program for \$4.00/day. There will be no guarantee against injury or death other than we assure you that care of the bulls will be to the best of our ability. We recommend that you protect your investment with insurance. All bulls can be kept free of charge until December 1, 2020 with the daily charge beginning on this date.

LIABILITY

All persons attending the sale do so at their own risk. MM Cattle Co. and Callaway Cattle Co. assume no liability for property damage or accidents that may occur.

INSURANCE

Insurance for your purchases will be available at the clerk's desk after the sale.

ANNOUNCEMENTS

Announcements made on sale day will take precedence over information printed in this catalog.

Some Thoughts on Taking Care of Your New Bull

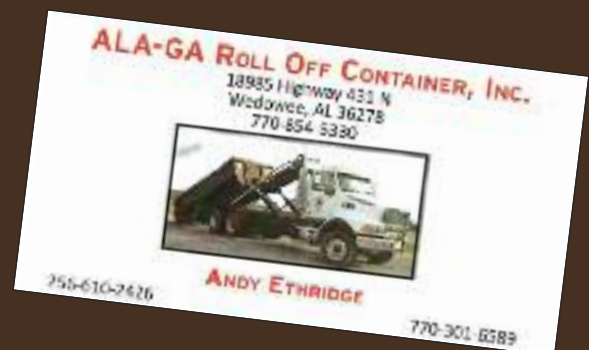

Developed by: Dr. Francis L. Fluharty Professor and Head
Department of Animal and Dairy Science The University of Georgia
ffluhart@uga.edu

- Be as calm and quiet as possible while loading, hauling, unloading, and moving him to his new location. This applies every time we work cattle, but is especially important in those instances where we are dealing with potentially highly-stressed cattle.
- ASK WHAT THE BULL'S DIET WAS THE LAST FEW WEEKS. Depending on how the animals had grown earlier in their life, they may have been fed a forage-based diet, or they may still be on a higher-grain diet. Why does this matter? It takes about 6 weeks for the digestive tract to expand after an animal is switched from a grain-based diet to a forage-based diet. When there is not enough time for the digestive tract to expand, such as buying a bull that's been fed a high-grain diet with limited forage, and turning it out for breeding within a couple of weeks after arrival, they lose a lot of weight quickly, because they are expending a lot of energy, and their digestive tract isn't large enough to allow for an adequate forage intake, so the bull loses weight, and sperm production decreases along with body condition score (BCS). Keep in mind that bulls lose body condition during the breeding season, so they should be a 5.5 to 6.0 at the beginning of the breeding season. Bulls that are too fat, however, are not athletic, and they have lower sperm counts and lower sperm motility.
- Young bulls are still growing. They don't reach their mature weight until 3 years of age. These young bulls require proper nutrition to keep sperm quantity and quality high. If you are providing any supplemental feed, don't use a 12% protein diet. Use a 14% to 16% protein diet to meet their requirements during the breeding season.
- During the breeding season, bulls will lose weight, and if their BCS goes below a 5, they may not get cows pregnant. Giving some supplemental energy in the form of a grain mix will allow them to maintain their BCS. If you grind corn, do not grind it fine. Coarser is better. You don't need to give them more than 1% of their body weight in grain, usually, once they are at a BCS of 5. This means that a bull weighing 1200 pounds wouldn't get more than 12 pounds of grain mix. Don't go from no grain straight to their final amount. Start low, at 5 to 6 pounds per day. Increase ½ pound every other day. Do not increase the amount of grain every day. Make no more than half-pound per day increases, and keep the amount offered the same for 2 days before the next half-pound intake.
- Finally, have a high-quality trace mineral program that's offered free-choice. Use loose minerals, and check your mineral feeders frequently to make sure that they aren't empty.

LONGER PARASITE CONTROL. BETTER PERFORMANCE. PROFITABLE CATTLE.

Invest in your herd – discover the DECTOMAX® and VALBAZEN® difference

- Control of parasites can result in more profitable cattle and higher quality carcasses¹
- DECTOMAX® Pour-On lasts up to twice as long as Ivermec® (ivermectin) Pour-On and generic ivermectin pour-on brands,² plus also outgains them by up to 21 lbs in field studies³
- VALBAZEN® Suspension provides broad-spectrum control of worms and liver flukes

IMPORTANT SAFETY INFORMATION FOR DECTOMAX: DECTOMAX Injectable has a 35-day pre-slaughter withdrawal period. DECTOMAX Pour-On has a 45-day pre-slaughter withdrawal period. Do not use in female dairy cattle 20 months of age or older. Do not use in calves to be processed for veal. DECTOMAX has been developed specifically for cattle and swine. Use in dogs may result in fatalities.
IMPORTANT SAFETY INFORMATION FOR VALBAZEN: Cattle must not be slaughtered within 21 days after the last treatment with VALBAZEN. Do not use in female dairy cattle of breeding age. Do not administer to female cattle during the first 45 days of pregnancy or for 45 days after removal of bulls.
